U3Q2C-S2-CI - T-0X - Multiplex converter DVB-S2 in 2 x COFDM with CI

from **1.010,12 EUR**

Item no.: 390107
shipping weight: 0.90 kg
Manufacturer: Teledes

Product Description

Converter REMUX DVB-S/S2 to DVB-T, with CIChannel strip for converting 3 satellite transponders DVB-S (QPSK) or DVB-S2 (QPSK/8PSK) from max. 2 satellite reception levels (3 tuners and 2 inputs) into one/two freely selectable DVB-T (COFDM) output channels with CI interface. The SAT transponders originate either from the 2 independent SAT inputs of the channel strip or via the input loop function of the headend.Highlights- Complete or selective removal of individual services so that they are not unintentionally recognised (and stored) by the receivers (STB)- Adjacent channel capability- Supports LCN (Logical Channel Numbering) for individual channel sequencing to simplify the receiver search- Programme filtering required to adapt to the maximum output data rate. Information about the utilisation of the output signal.- Programmable with CDC handheld programmer- Monitoring and signal status display via LEDsFeatures- Filling with zero packets (stuffing unit) for a fast search in the receiver or when using a receiver with fixed symbol rates- PIDs editing possible- Editable TS_ID to facilitate the programming of the DVB-T receiver. Performs the channel scan based on the data listed above- Network_ID, Original Network_ID, Cell_ID and S_ID editable- Through its CI interface and the corresponding CAM module, encrypted channels are converted into free DVB-T signals. Depending on the CAM module used (standard/professional), one or more services are decrypted.
