UFB24SC-A - Front panel 19", 1U, 24 SC with storage compartment

from **84,25 EUR**

Item no.: 389558
shipping weight: 0.60 kg
Manufacturer: Teledesic

Product Description

Designed for SC-to-SC simplex or LC-to-LC duplex adapters, can be used as a connection point for fibre optic cables (fibre optic patch panel). This makes it easy to connect multi-fibre cables or several optical cables so that they are easily accessible and identifiable. Enables the use of a fixed fibre optic distribution network to which different signals can be sent by simply reconnecting them at the panel. Thanks to its wide design, it facilitates the installation and maintenance of the splice boxes housed in it. In addition, the position of the splice box can be set back in relation to the cabinet profile to protect the connectors from knocks or chafing and to enable the door to be closed easily. The splice box is adjusted by adjusting a screw on the side. This can be done during installation or afterwards via the side doors of the rack. - High load capacity and durability: made of steel - Each connection is marked with a laser-marked number (1...24) - Black colour (RAL 9005) - 4 screws and 4 nuts included for installation in a 19" rack. - Equipped with a fibre optic tray and cover for holding the various optical splices - Clamps and flanges for fastening and guiding the various fibre optic cables included in the scope of delivery
