

Item no.: 390047

MVM329LTE2 - Terr. mast amplifier VHF -2dBVHF 21dB UHF 29dB

from **47,88 EUR**

Item no.: 390047
shipping weight: 0.90 kg
Manufacturer: Teledes

Product Description

Mast amplifiers are the ideal products for combining the different terrestrial frequencies. Equipped with 3 outputs: The signals at the BIII and UHF inputs are amplified, the VHF signals are looped through 1:1. Supports RED. Highlights- Equipped with USOS technology: The installer selects the desired constant output level. The device automatically adapts the gain to the change in the input signal- Separate gain and low noise figure to ensure signal quality- Very small ergonomic design- EasyF connection system- Can be operated in the 12 V to 24 V range- Fully automated production subject to the strictest quality controls.- Cast housing with very good shielding properties. Cast housing with very good shielding properties Features- LTE switch ON/OFF.- DC pass-through switch ON/OFF.- Automatic gain control- UV-resistant ABS plastic housing for outdoor installation of the products
