

Item no.: 392164

KE100 - Kasa - Intelligent thermostatic radiator valve

from **36,85 EUR**

Item no.: 392164
shipping weight: 0.40 kg
Manufacturer: TP-LINK

Product Description

Take control of your home to a higher level with Tapo smart elements. The smart thermostatic head with direct temperature indication from the Tapo family can control the temperature in the radiators according to your schedule and instructions from anywhere, thanks to communication with the central unit (KH100 - not included) according to a wireless frequency of 868 MHz, which is required for proper functionality and can operate up to 32 thermostatic heads simultaneously. The head is powered by 2x AA long-life batteries (depending on how often the valve is operated), so you can indulge in smart living without having to run new wires around the house or change power connections. Key Features- Remote control - Control all the radiators in your home from your phone. No more guessing if you've left the heating on in an empty room.- Voice control - Ask Alexa or Google Assistant to fine-tune the temperature in your home.- Smart schedule - Set heating schedules based on your daily routine to make heating more efficient.- Frost protection - Keep your pipes from freezing and your home safe.- Child lock - Prevent your home from freezing. Child lock - Prevent children from accidentally operating your radiator.- Install it yourself - Simply replace your old radiator valve with Kasa and follow the step-by-step instructions in the app for installation. Package contents- Thermostatic head with M30x1.5- (2) AA/LR6 batteries- RA adapter- RAV adapter- RAVL adapter- Lid opener
