Item no.: 392195
TAPO T310 - - Intelligent temperature and humidity sensor

from **16,48 EUR**

Item no.: 392195
shipping weight: 0.10 kg
Manufacturer: TP-LINK

🖹 Product Description

Product descriptionThe intelligent Tapo T310 sensor is used to detect temperature or humidity thanks to a high-precision sensor (accuracy: ±0.3 °C, ±3% RH) for recording and updating data every 2 seconds. The sensor is part of the intelligent Tapo smart home family and enables the programming of various automated events, e.g. switching on the heating. The sensor is powered by a small CR2450 battery with a lifespan of approx. 2 years and communicates wirelessly on the 868/922 MHz frequency with the Tapo Smart Hub H100 central unit, which is required for the sensor to function. A double-sided 3M adhesive tape is used on the back of the sensor for easy, tool-free installation on any flat surface.Key features- Fast and accurate monitoring - Data collection every 2 seconds- Home automation - Automatically turns home electronics on/off when settings are out of range- Free data storage and visual graphs - Records temperature and humidity data and creates regular data summaries- In-app notifications- Receive instant notifications on your phone, when readings are outside the preset ranges- Flexible installation - hang it from a cord, attach it to a surface with glue or a magnet, or simply place it on a tableTechnical parameters- Wireless frequency: 868 MHz, 922 MHzPower- Power supply type: batteryPhysical properties- Operating temperature [°C]: -20 to 60- Width [mm]: 46- Height [mm]: 46-
Depth [mm]: 12
