Product Description

frient Electricity Meter Interface 2: Wireless meter reading, energy consumption monitoring, interface for electricity meters with LED pulses, Zigbee, works with Homey and SmartThings. Become energy conscious with remote meter reading via the Electricity Meter Interface 2. Track your energy consumption, recognise consumption peaks, reduce consumption and save money. Help the environment: Shift some of your consumption to off-peak times. Easy installation: Mount this device yourself to a meter that has an LED to indicate power consumption. HUB REQUIRED: This Zigbee device requires a hub to connect to your smart home. The Electricity Meter Interface 2 works with Homey and SmartThings, among others. Note that not all functions work with all hubs. This device is compatible with: Meters that have a flashing LED light with a standard output rate of 1000 pulses/kWh. Pulse rates are configurable with selected hubs. Find out about your electricity consumption. This device is called an Electricity Meter Interface - but you can use it to track what your meter is showing with LED pulses. The Electricity Meter Interface 2 really is a helpful little friend that allows you to recognise your consumption peaks and shift some of your consumption to off-peak periods - for the good of the grid, the environment and your electricity bill. Working with meters with flashing LED light. This electricity meter interface works with meters that have an LED to indicate electricity consumption and a default output rate of 1000 pulses/kWh. However, configuration of the pulse rate is possible with selected hubs. Easy installation. Mount the electricity meter interface 2 on your meter and start remote reading via a compatible smart home hub. You do not need professional help for the installation. You can do it yourself. Features - Informs you about your energy consumption - Works with meters with LED display of power consumption - Easy installation - Communication: Zigbee - Battery: 2 x AA, replaceable - Battery life: 2 years, updates every 5 seconds, at room temperature - IP class: IP22 - Operating temperature: -20 to +60°C - Item dimensions (WxHxL) 95 x 65 x 22.3 mm - Packaging dimensions (WxHxL) 170 x 120 x 36 mm - Item weight (net) 0.066 Kg - Item weight (gross) 0.175 Kg - Battery AA - WEEE - CE - IP class IP22
