

Item no.: 389434

ADS-LIZ-JS - DS licence SYNC per year SW

from **38,30 EUR**

Item no.: 389434
shipping weight: 0.00 kg
Manufacturer: Televes

Product Description

The central management and control application of Arantia DS is hosted within the Televes cloud infrastructure and the distributed DS playback devices access it from any location with internet access. Therefore, each playback device in the system must be registered with an active DS Cloud Hosting licence, which includes a one-year access to the Arantia DS system. The first year licence is already included in the DS playback devices, so it will be necessary to purchase a new DS Cloud Hosting licence to access the system from the second year onwards. Highlights- For remote operation of Arantia DS via the cloud solution- Perfect for DS applications with a large number of DS playback devices at different locations.- DS functionality update is performed on the system hosted in the Televes' cloud- Simultaneous management of multiple players from a single location and via a single management interface Features- Access control for each playback device- Annual renewal- Licence renewal management within the application itself- Web management tool- Cloud-based architecture- Scalable solution- Individual user or user group management Individual user or user group management- Management of DS playback devices- Content management- Secure download of content to the playback devices- Templates and content designer- Loop function for content- Calendar-based playback management- Display programmable to switch on/off- Various options for playback devices: External IP receivers and built-in/embedded in DS Display
