Product Description

Maclean MCE536 High-quality infrared electric heater. During operation, the heater does not heat the air itself, but warms the surrounding objects and the human body (improves blood circulation in the body). Infrared heating is more effective and efficient compared to heating with traditional convector heaters. In addition, it has a positive effect on health - it improves blood supply to the skin and blood circulation, supports the muscles, joints and immune system. Easy operation The heater can be controlled with a remote control, buttons on the housing or from a phone/tablet with the free Tuya Smart app installed. With the app, you can set the desired temperature or set the timer from anywhere, including away from home. The app allows you to control the operating time by turning the heater on/off for a user-selected period of time (1-24h) and setting a weekly schedule. Intuitiveness This panel is also distinguished by a pull-out LCD display, which shows information about the currently selected heating mode, the selected temperature, the current room temperature and the status of the wi-fi connection. Using the buttons on the housing, you can quickly change the target temperature or set the timer. Modern design and easy installation The radiator's elegant design makes it fit easily into any interior. The radiator can be mounted both on the wall and placed on the floor. Mounting accessories and non-slip feet are included.
