Product Description

High-quality Maclean MCE517 infrared electric heater. During operation, the radiator does not heat the air itself, but heats the surrounding objects and the human body (improves blood circulation in the body). Heating with infrared rays is more effective and efficient compared to heating with traditional convector heaters. In addition, it has a positive impact on health - it improves blood supply to the skin and blood circulation, supports the functioning of muscles, joints and the immune system. The heating can be controlled using a remote control, touch display or from a phone/tablet with the free Tuya Smart application installed. Thanks to the application, you can set the selected temperature or set the timer from anywhere, even outside your home. Using the touch display buttons, you can quickly change the target temperature or set a timer. The elegant design of the radiator makes it easily fit into any interior. The radiator can be mounted either on the wall or placed on the floor. The set includes mounting accessories and legs.
