

Item no.: 382170

MCE995 - Maclean metal detector, with discriminator, yellow, Hunter

from **111,33 EUR**

Item no.: 382170
shipping weight: 1.50 kg
Manufacturer: Maclean Brackets

Product Description

A very useful device for any metal detector. It allows you to detect small metal coins as well as steel beams in the ground or in walls. Precision is guaranteed by a highly sensitive electronic display on the LCD screen. The detector is equipped with an arm holder and an adjustable probe arm length. The measurement results are read on a clear LCD display, and an acoustic signal is also helpful. To avoid attracting attention, simply connect the headphones to the 3.5 mm jack socket. WATERPROOF 9.5-inch PROBE - allows you to use the detector even if you have to put the probe in shallow water. The concentric probe allows you to cover a larger portion of the surface and is more effective than smaller coils! LCD display shows: - probable metal type- target depth- discrimination and intersection area (DISC and NOTCH)- sensitivity level (SENS)- volume- battery charge level- digital target identification Specification- Manufacturer: Maclean- Model: MCE995 Hunter- Distinguishing metals (DISC)- Adjustable sensitivity (SENS)- Pinpoint (target identification)- LCD screen- Audible target identification- 3.5 mm headphone jack- 9.5' waterproof coil- Detector height adjustment- Power supply: 2x 9V battery (not included) Set contains- Maclean metal detector, with discriminator, yellow, MCE995 Hunter- User manual- Manufacturer's packaging Features- PINPOINT - Location of the find- Differentiation between metal types- Adjustable sensitivity (SENS)- Low battery indicator- Operation with two 9 V alkaline batteries- Waterproof search coil- 3 sound tones for different metal types- Notch mode: By setting the notch range (ignore), the device skips metal waste and recognises more valuable objects- 3.5 mm headphone output for connecting headphones
