from **47,88 EUR**

Item no.: 382221
shipping weight: 1.40 kg
Manufacturer: Maclean Brackets

Product Description

A very useful device for every searcher of metal objects. It allows you to detect both small metal coins as well as steel beams in the floor or walls. The precision of indications is ensured by a highly sensitive analog indicator. The MCE991 detector has an arm handle and an adjustable probe arm length. The measurement results are read on a clear analog display and an acoustic signal is heard. To avoid attracting attention, simply connect the headphones to the 3.5mm jack socket. The device has a volume control. Safe, Energy-saving, Universal, Comfortable, Durable! The detector has an internal speaker volume control and an additional headphone jack. Thanks to the good balance of the device and the comfortable arm grip, the searcher's work will become even more enjoyable. Search depths (approximate): Small items, e.g. coins: up to 10 cm Medium items, e.g. gun: up to 25 cm Large items, e.g. knight's armor: up to 40 cm Very large items, e.g. tank: up to 120 cm Technical Specifications Metal detector with a discriminator Metal Discrimination (DISC) Built-in speaker 3.5mm headphone output Sound signaling Analog tilt indicator Coil diameter 19cm Waterproof coil Battery consumption indication (Low Batt) Detector operation signaling (Power) Battery powered 1x9V (6F22) (not included) Auto tuning Volume control Adjustable length: 78-106cm
