## OAIM - Fibre optic stripper multifibres

from **142,92 EUR**

Item no.: 389822  
shipping weight: 0.20 kg  
Manufacturer: Televes

### Product Description

Professional tool for stripping cables with different diameters. It is specially designed for multi-fibre cables, data cables and coaxial cables. It enables quick, safe and precise stripping of PE, PVC, LSFH, etc. sheaths. The application range is adjustable from 4.5 to 29 mm diameter. The cutting depth can be easily adjusted from 0.1 mm to 3 mm using the height regulator integrated in the blade base. The rotary mechanism enables the fibres to be stripped using a triple-action system: - Circular opening (transverse to the hose) - Vertical opening (lengthwise of the hose) - Spiral opening (combination of the two aforementioned methods, often used to remove high-strength covers more easily) The ergonomic and compact design makes the tool easier to handle and store. In addition, it has a spring lock that holds the cable securely when cutting the sheath. Supplied in individual packaging. Highlights - Adjustability: allows stripping of cables with different diameters (between 4.5 and 29 mm) - Versatility: the spiral cut makes it possible to strip the fibre in the middle of the cable without having to split it. It is also possible to strip from the ends - Comfort: ergonomic design for easy handling - Durability: the blade is hardened to ensure a long service life Physical data - Net weight: 120 g - Gross weight: 120 g - Width: 38 mm - Height: 137 mm - Depth: 27 mm - Main product weight: 97 g Packaging - Carton 1 pc.
