Product Description

Description This docking station by Delock is used for the external connection of a 2.5" or 3.5" SATA HDD or SSD or an M.2 NVMe or SATA SSD via the USB interface. This solution means that no external housing is required as the drive is inserted directly into the docking station. Well cooled A large fan, which is located directly behind the inserted memory, ensures sufficient cooling of the SSD or HDD. The fan can be switched on or off separately. Extensive connection options Thanks to the specially designed adapter, the Delock docking station can also be quickly and easily connected to the USB type A socket. This means it can be easily connected to new devices with a USB Type-C™ socket and older devices that only have a USB Type-A connection. The adapter is located directly on the cable and therefore cannot get lost.
