83200 - Active optical cable USB 10 Gbps Type-A plug to USB Type-C plug m

from **148,26 EUR**

Item no.: 394689
shipping weight: 0.40 kg
Manufacturer: Delock

Product Description

Description This USB cable by Delock enables the connection between devices with USB Type-C™ connector and a PC or notebook with a free USB port. The screws of the USB Type-C™ connector ensure a secure connection and prevent the cable from being pulled out unintentionally. **Active Optical Cable** This active optical cable uses fibre optics to transmit high-speed signals. Compared to the traditional copper cable, it is softer, thinner, lighter and can transmit signals loss-free over longer distances. **Durable cable sheath** made of NBR The material of the cable sheath makes the cable flexible and resilient, so it can also be used in drag chains and harsh environments. **USB with 10 Gbps** The active optical cable enables data transfer rates of up to 10 Gbps when connecting USB 10 Gbps compatible devices. Of course, USB 2.0 devices can also be connected. **Technical data** Connectors: - 1 x USB 10 Gbps Type-A plug - 1 x USB 10 Gbps USB Type-C™ plug with screws on the side - Screw spacing: 15 mm (USB Type-C Locking Connector Standard) - Screw type: M2 x 2 - Active optical cable: fibre optic / copper hybrid cable - Data transfer rate up to 10 Gbps - Fixed signal direction - Backwards compatible with USB 2.0 - Output current: up to 900 mA - Cable diameter: approx. 5.8 mm - Smallest bending radius: approx. 20 mm - Cable sheath material: NBR - Suitable for drag chains - Operating temperature: -10 °C – 50 °C - Colour: black - Length incl. connections: approx. 5 m Package contents - USB 10 Gbps cable
