Product Description

P110 from TP-LINK is a great addition to any household that wants to be "smart". Offers a variety of useful features from the remote control function of the socket, including the timer. You can control everything via integration with Google Assistant and Amazon Alexa. Main benefits - Remote control - instantly switch connected devices on or off wherever you are via - TAPO-Schedule - create a schedule for automatic device management - Timer - create timer lists for connected electronics - Voice control - manage the socket with voice commands via Amazon Alexa or Google - Assistant - Absence mode - automatically switches devices on and off at different times, to give the impression that someone is at home - Supports Google Assistant and Amazon Alexa - Energy consumption monitoring - Remote control - Have you forgotten something in your smart socket P110 in the next room and want to change it? Or are you no longer at home and have doubts about whether you can disconnect an appliance from the socket? Then use the Tapo application. It allows you to reliably disconnect the appliance from the power supply. Set your switch-on and switch-off schedule. Do you go to the bathroom every day at six in the morning? Do you switch on the air purifier regularly? Let the P110 do it for you. Simply set a schedule and that's it! Compact size and easy set-up - The P110 has its own compact design that prevents it from blocking any drawers. It is characterised by simple set-up and use. No hub is required to plug it in, everything is quickly set up and easy to manage with the free Tapo app. Key features - Connect a smart device to a European socket that is pass-through enabled (other devices can be connected to it). Setup and control is possible via Bluetooth and WiFi 802.11 b / g / n. Maximum load: 3 680 W, 16 A. Supports voice control (Google Assistant, Amazon Alexa). Energy consumption monitoring.
