from **92,80 EUR**

Item no.: 392175
shipping weight: 0.60 kg
Manufacturer: TP-LINK

Product Description

Product description VIGI C350 is an IP camera designed to monitor various locations. Thanks to a large number of alarms, it is possible to set the tracking of a specific object and in case of removal from the frame or already when handling the object, the camera will alert us. The camera is equipped with a 5 MP lens. For night surveillance of premises, there is an infrared LED and a white light that illuminates the area up to 30 meters. It uses the Smart IR method, which prevents over-illumination of the area, allowing for easier face recognition. The True WDR function, in turn, ensures quality colour reproduction. The camera can be equipped with an SD card with a capacity of up to 256 GB. To set up and operate the camera, use the VIGI app or the standard web interface. The camera offers two-way audio. It also has Full-Color technology, which allows you to get a color image even in night conditions. The camera can be powered via a 12V DC connector or via an 802.3af PoE Ethernet cable with a maximum power consumption of 10.5 W. Key Features: - 6 mm lens - Maximum resolution 2880 X 1620 pixels (30 FPS) - Large number of alarms (Cars, People, Zone, etc.) - True WDR 120 db - 90° viewing angle - Full-Color Technology Package Contents: - Device - Screws - Wall mount - Waterproof Cable Cover
