from **51,95 EUR**

Item no.: 392295
shipping weight: 0.50 kg
Manufacturer: TP-LINK

Product Description

Take control of your home to a higher level with Tapo smart elements. The smart thermostatic head with direct temperature indication from the Tapo family can control the temperature in the radiators according to your schedule and instructions thanks to communication with the central unit (KH100 - is included) according to a radio frequency of 868 MHz, which is required for proper functioning and can operate up to 32 thermostatic heads simultaneously. The head is powered by 2x AA long-life batteries (depending on how often the valve is operated), so you can indulge in smart living without having to run new cables around the house or change power connections. Key features Remote control - Control all your radiators in your home from your phone. No more guesswork when you've switched on the heating in an empty room. Voice Control - Please use Alexa or Google Assistant to accurately adjust the temperature of your home. Smart Schedule - Set heating schedules based on your daily routines to make heating more efficient. Frost Protection - Keep your pipes safe from frost and your home safe. Child Lock - Prevent children from accidentally operating your radiator. Install it yourself - Simply replace your old radiator valve with Kasa and follow the step-by-step instructions in the app for installation. Package contents- H100 Smart IoT Hub- Thermostatic head with M30x1.5- (2) AA/LR6 batteries- RA adapter- RAV adapter- RAVL adapter- Lid opener Wireless features- Wireless frequency: 868 MHz Physical characteristics- Operating temperature [°C]: 0 up to 40 - Width [mm]: 57 - Height [mm]: 57 - Depth [mm]: 84
