Product Description

No blue light, no eye fatigue The asymmetrical optical design ensures glare- and flicker-free light at your workplace by gently directing the light downwards and not directly in front of your eyes. No screen reflections, no eyestrain and no tension headaches. Rechargeable battery makes everything easier. With a full charge, the light lasts for up to 150 minutes without any annoying cables. With the USB port and built-in 1800 mAh lithium battery, you can use this light bar anywhere, anytime. Type-C port and USB charging. Enjoy the many charging methods supported by the USB Type-C charged monitor light bar. When connected to a computer, the lights will automatically light up when the computer is turned on. 3 Colour Temperature Modes & Stepless Dimming. Yeelight rechargeable LED monitor light bar offers 3 colour temperature modes and stepless dimming with sensitive touch control to create different moods for different needs. Work time? Playtime? Film night? Deal! The backlit touch panel enables precise and simple control. The reflective surface of the backlit touch screen is easy to recognise and operate. With the high-precision touch buttons that respond instantly to your touch, you will experience a beautiful and seamless interaction. An intelligent light that remembers your preferences. If the light is switched off or the power fails, it will return to the previous lighting state when it is switched back on. The light remembers your settings and automatically configures everything for you. Features: - Rechargeable monitor light strip - Rated power: 5W (64 x 0.2W/LED module) - Power supply: DC 5V=1A - Colour rendering index: 95 - Service life: 25,000 hours - Rechargeable battery: 1800mAh, Type-C USB charging
