Product Description

Yale Linus Adjustable Cylinder Product information "Yale Linus Adjustable Cylinder" YALE LINUS ADJUSTABLE CYLINDER - The Yale Linus Adjustable Cylinder is guaranteed to work with the Linus Smart Lock. Depending on which cylinder is currently in your door, you may need to replace it to be compatible with the Linus Smart Lock. UNIT SIZE - designed to replace almost all Euro cylinders. Use our compatibility checker on our website to see if your Linus will fit the existing cylinder. Set the adjustable Linus cylinder to the same length as your current cylinder using the supplied extension pieces. Enables compatibility on the following doors: Where the Euro profile cylinder does not have an emergency function, i.e. the cylinder cannot be operated from the outside if there is a key on the inside of the existing cylinder. Or where there is a knob on the existing cylinder. SECURE AND PROTECTED - 6-pin cylinder with security class 6 1-B-C5A in accordance with DIN EN 13030. Our Linus Adjustable cylinder has additional security features such as anti-pick, anti-drilling, anti-impact and anti-pull protection. EASY TO INSTALL - A screwdriver and 2 Allen keys included in the set are required to install the cylinder on your door in just 15 minutes. Watch our video to install your Linus Smart Lock on the adjustable cylinder. LENGTH ADJUSTABLE - Internal cylinder length: 30 mm minimum, 65 mm maximum and 5 mm size increments, external cylinder lengths: 30 mm minimum, 60 mm maximum and 5 mm size increments. 2 KEYS INCLUDED - Option to order replacement keys on our website with the code shown on your security card.
