### Product Description

Optical cable from the renowned Maclean company, model MCTV-453. One of the main advantages of this model are reinforced metal plugs, which provide cables from this line with durability unheard of on the market. The cable is also very flexible. The cable was developed to meet the strictest technical requirements and satisfy the most demanding audiophiles, while surprising with its excellent design. Maclean cables ensure lossless signal transmission for the purest and most realistic sound effects. The Maclean optical cable is especially recommended for high-quality digital connections - regardless of whether it is a satellite tuner, Blu-ray player, game console or other modern entertainment equipment. The cable is ideal for connecting e.g. a CD/SACD/Blu-ray/DVD/TV/SAT player or a computer/console with a home theater receiver in order to transmit a digital audio signal. By connecting your home theater with our cable, you will get 5.1 or 7.1 surround sound. It is currently the most technologically advanced cable on the market! High quality guaranteed by a renowned manufacturer. By connecting multimedia devices to a home theater receiver with this cable, you can obtain digital effects: Dolby Digital, Dolby ProLogic, Dolby Surround, DTS, etc. Specification- Producer: Maclean- Model: MCTV-453- Length: 3m- Connector: Toslink T-T- Ultra thin and flexible cable (only 4mm)- Cable made of the highest quality bending-resistant fiber optic cable- Narrow cable for increased comfort and mobility- Metal connectors are covered with 24-carat gold to ensure the best contact with the sockets in the equipment- Provides lossless transmission of uncompressed signal- Very precise and solid workmanship- 99.99% EMI immunity- Meets CE standards Set contains- 3m Maclean MCTV-453 Toslink T-T digital optical cable- Manufacturer's packaging- A proof of purchase Maclean is a global market leader in specialist cables, home theater accessories, hi-fi systems and PC connections.
