UFB3DIN24 - 19" housing DIN rail 3U 24-pin

from **84,05 EUR**

Item no.: 389285
shipping weight: 1.30 kg
Manufacturer: Teledesic

Product Description

19" enclosure with DIN rail 3U with earth cable, for up to 24 single-pole positions. Designed for the installation of standard DIN rail-compatible devices. Provides a uniform location for all peripheral devices that have this standardised mounting system, facilitating organisation in the rack. The main application is to house circuit breakers and circuit breakers, normal or resettable. These devices protect the installation from overvoltages or electrical leaks by closing the circuit and diverting the current to earth. The DIN rail has an earthing cable that is anchored to the chassis with a threaded screw and ensures current discharge. The removable cover allows easy handling and mounting of the devices installed on the DIN rail. It also has protective profiles on the edges of the panel to prevent damage or cuts to the electrical cables and thus reduce the risk of accidents. Highlights - High load capacity and durability: made of 1.5 mm thick steel - Extremely easy to install and use - Black colour (RAL 9005) - Designed as a 3U - It offers space for up to 24 single-pole or 12 double-pole modules - 8 screws and 4 ring nuts included for installation in a 19" rack
