Product Description

WLAN extension camera for Yale Smart Home CCTV Kits. This product is only suitable for extending the Yale Smart Home CCTV Kits. Withstands all weathers. The cameras are ideally suited for outdoor use in accordance with IP67 and withstand all weathers - whether rain, sun or snow. Even in the dark, the cameras still provide high-resolution and crystal-clear images thanks to 20 metres of night vision, so that your property is optimally protected around the clock and even in bad weather conditions. Optimum protection in full HD resolution. The surveillance camera set provides optimum protection in crystal-clear full HD resolution around the clock - even in the dark and in bad weather, of course. View the recordings stored locally on the recorder or the live view from a connected monitor or via the free Yale View app - from anywhere in the world. You can use the app to receive intelligent push notifications about detected movements on your property at any time. So you always know what's happening at home. Features: - Protection: IP67 - Camera resolution: Full HD 1080P - Night vision: 20m via infrared - Wireless technology: Wi-Fi. Further data: WEEE: yes CE: yes IP class: IP67
