UVKF42 - Vertical cable gland for 19" 42U rack

from **60,38 EUR**

Item no.: 390135
shipping weight: 3.70 kg
Manufacturer: Teles

Product Description

Vertical cable management for 19" rack 42U, with 9 guide rings Enables the rack's cabling to be optimally organised while improving access to it and the visual appearance Has rear and side openings that make it easy to distribute the cabling to the different levels of the rack. The metal structure helps dissipate heat and the open design allows air to circulate, limiting temperature rise. This is particularly important in distribution cabinets for Ethernet networks, as PoE cables are often used and can become hot when power is channelled through them. The front cover protects the cables, prevents them from protruding and improves the aesthetics of the rack as it is not visible. This is a single component designed for 42U racks, but can also be adapted to other rack sizes. Dimensions (W x H x D): 95mm x 1840mm x 70mm Highlights- 9 guides with 70mm depth for convenient cable organisation- With openings at the back and sides for easy cable distribution in different rack levels- The front protective cover keeps the cables in the guide and improves the aesthetics- High load capacity and durability: Made of steel- Extremely easy to install and use- Compatible with 42U high and 800 mm wide cabinets- 6 screws and 6 nuts included for installation in a 19" rack
