## MCE952 - Maclean metal detector, with discriminator

from **60,72 EUR**

Item no.: 382298  
shipping weight: 2.00 kg  
Manufacturer: Maclean Brackets

### Product Description

Perfect for treasure hunting on the beach, in the meadow, in the forest, etc. A very useful device for any hunter of metal objects. It allows you to detect small metal coins as well as steel beams in the ground or in the wall. The precision of the readings is guaranteed by a highly sensitive analogue display. The MCE952 detector has an arm handle and an adjustable probe arm length. The measurement results are shown on a clear analogue display and an acoustic signal sounds. To avoid attracting attention, simply connect headphones to the 3.5 mm jack socket. The detector has an internal volume control and an additional headphone connection. Thanks to the good balance of the device and the comfortable arm grip, the searcher's work becomes even more pleasant. Safe coil/probe Thanks to the modern 19cm coil, the detector is ideal for searching for small and large finds, treasures or everyday metal objects. In addition, the coil is completely waterproof, so it can also be used to search in wet areas. Energy-saving 9V power supply The featured detector is energy-saving as it only requires one 9V battery to power the detector, rather than 5 or more batteries as with competitor products. The use of an easily accessible cell allows quick replacement even in the field during the search, and in addition, such a battery is cheap and widely available. Universal design The detector is universal, you can use it on the beach, in the forest, in meadows and fields. It is useful both when searching for lost keys and on a trip to the seaside. Thanks to its light weight and comfortable grip on the forearm, it can also be used by children. Practical connections Thanks to the 3.5 mm jack plug, you can connect almost all headphones. This is a standard connection that is present on most headphones, e.g. MP3. If you do not want to use headphones, our detector is equipped with an internal loudspeaker that signals the find. In addition, you can watch the indications on the analogue display. Durable The best materials available on the market were used to manufacture the detector. The lightweight and mobile design allows you to take the detector with you wherever you go. You can always have it to hand, e.g. on the beach, on a bike tour, in a tent, etc. The adjustable length of the probe arm makes it easy to fold up the detector. Specification - Discrimination of metals (DISC) - Built-in speaker - 3.5mm headphone output - Sound signalling - Analogue tilt indicator - Coil diameter 19cm - Waterproof coil - Battery consumption indicator <8.8V - Battery operation 1x9V (6F22) (not included) - Operating frequency: 22 kHz - Adjustable length: 78-106cm - Description of detector components: - A - Shoulder handle - B - Handle with scan button - C - Control panel - D - Battery compartment - E - Telescopic guide - F - Guide length adjuster - G - Second part of telescopic guide - H - Vertical loop adjustment - I - Induction loop - Description of symbols on the display: - LOW BAT - low battery - VOLUME - volume - TUNE - noise reduction setting - HEADPHONES - signalling, when headphones are connected - DISC - Discrimination control Set includes - New metal detector - Dedicated 19cm coil/probe - User manual in Polish and English - Elegant box Detector features - Distinguishing between ferrous and non-ferrous metals (by applying discrimination) - Sound signalling (via built-in speaker or headphones) - 3.5mm headphone output for connecting headphones - Analogue discrimination display - Low battery indicator Search depths (approximate): - Small objects, e.g. coins: up to 10 cm - Medium objects, e.g. pistol: up to 25 cm - Large objects, e.g. knight's armour: up to 40 cm. e.g. knight's armour: up to 40 cm - Very large objects, e.g. armour: up to 120 cm Features - Distinguishing metals (DISC) - Built-in speaker - 3.5 mm headphone output - Sound signalling - Analogue tilt indicator - Coil diameter 19 cm - Waterproof coil
