Product Description

Smart Z-Wave® switch, 1 channel 8 A with power measurement. The world's smallest Z-Wave smart switch for intelligent control. Automate and control your lighting or a variety of small electrical appliances remotely and measure their power consumption. Thanks to its compact design, the Wave 1PM Mini fits into even the smallest electrical boxes and/or appliances. **WHY WAVE 1PM MINI?** Mini size, mini price. Designed with convenience in mind, these mini relays offer all the capabilities of the Wave 1. The size has been reduced by 35%, making the Wave 1 Mini perfect for tight spaces where traditional relays simply won't fit. Despite the small size, Wave Mini devices do not compromise on performance or functionality. Works with any Z-Wave gateway. Wave 1PM Mini is retrofittable and designed to fit behind switches/pushbuttons. Once installed, add the device to your Z-Wave network (a Z-Wave gateway is required) and control it with your smartphone or tablet. Shelly Qubino devices are compatible with over 4000 Z-Wave certified devices and gateways. **Smart schedules** Create personalised schedules that adapt to your daily routine or synchronise with sunrise/sunset to control your lights (gateway required). **Smart scenes** Set custom scenes by combining the Wave 1PM Mini with other Z-Wave devices (gateway required). **Associations** Set up direct communication between devices in your local Z-Wave network and set customised actions, even without a hub! **Power monitoring** Wave 1PM Mini offers precise monitoring of power consumption. **Use cases:** Keep track of your power consumption and save money. With Wave 1PM Mini's built-in precise power measurement, you can easily track and control the consumption of smaller electrical devices such as consumer electronics, fans, lighting fixtures and kitchen appliances. This makes it easier for you and saves you money. **Create a cosy movie night atmosphere with intelligent scenes** Combine the Wave 1PM Mini with other devices and create custom scenes based on the time, lighting or various triggers. With the "Movie night" scene, you can prepare your home for a cosy movie night with your friends and family. With just one click on your smartphone, you can adjust the lighting, close the curtains and set the temperature for an extra cosy feel. **Make every small electrical device in your home smart** Turn any electrical device in your home, old or new, into a smart device with the Wave 1PM Mini. Its 8 A limit is perfect for small to medium sized appliances such as lamps, electric kettles, etc. Place the device in the socket or discreetly in the housing of the appliance without the need for additional external wiring. **Features:** - Supports up to 8 A at 240 V AC - Self-consumption: < 0.3W - Operating temperature: -20°C - 40°C - Humidity: 30 - 70% RH - Wireless technology: Z-Wave 868.4 MHz - Z-Wave repeater: Yes - Range: up to 40m indoors - Conductor cross-section: 0.5 to 1.5mm - Overload protection: Yes - Overheating protection: Yes
