NEW

Product Description

The Shelly Wave 2PM Relay 16A 2 Channel transforms an ordinary two-pole wall switch into an intelligent switch. It enables the remote control of two electrical devices, such as lights, ceiling fans, IR panels and IR heaters. It switches (on/off) two independent loads and measures their power consumption separately and in total. Connected devices can be controlled either via a smartphone or a tablet, according to schedules or scenes, etc. It is compatible with switches or push buttons. Features: - Relay -Wave 2x 10A (16A total)- Measures the power consumption of the connected device on each channel- Small size ensures easy installation behind any wall switch or wall socket- Extended wireless range: up to 40m indoors- SmartStart for automatic setup.- OTA firmware update for over-the-top devices - SmartStart for automatic setup. OTA firmware update for over-the-air updates- S2 Security authenticated- Extremely low energy consumption: less than 0.3 W- Works with Z-Wave certified hubs and over 4,000 Z-Wave devices- Power supply: 110-240 V AC / 24 V DC +/-10%- Max. switching current AC: 10 A per channel. Switching current AC: 10 A per channel, 16 A total, 18 A total peak- Max. Switching voltage DC: 30 V- Max. Max. switching current DC: 10 A- Overheating protection: Yes- Overload protection: Yes- Distance: Up to 40 m indoors (131 ft.) (depending on local conditions)- Z-Wave S800- Ambient temperature: -20°C to 40°C- Humidity: 30% to 70% RH- Maximum altitude: 2000 m
