Product Description

Aqara Water Leak Sensor T1 Product information "Aqara Water Leak Sensor T1" The water sensor T1 from Aqara fulfils the requirements of IP67 (waterproof and dustproof). It can be placed in damp and dusty environments. Fits anywhere The Aqara Water Sensor T1 can be placed anywhere and protects your home with its elegant design. Smart control in the Apple Home app Compatible with other HomeKit-enabled accessories in the Apple Home app to make your life easier. Aqara home automation Together with other smart accessories, you can create different scenes. Even if the Wi-Fi connection is unstable or disconnected, the automations connected to this product will work properly as long as the hub is powered. Closes the water valve to protect your property After detecting a leak, the Aqara Water Sensor T1 triggers the smart socket to turn off the magnetic water valve immediately. Triggers an alarm when flooding is detected When the water level reaches 0.5 mm, the water sensor triggers an alarm at the hub and sends a notification to your phone. Technologically advanced The device is made of UV-resistant material that prevents colour fading, allowing for long-term use. It consumes little energy and a button battery lasts over 2 years under normal circumstances. Features- Wireless technology: Zigbee 3.0- Battery type: CR2032- Battery life: up to 2 years- Operating temperature: -10°C - +55°C- Humidity: 0 - 100% RH- IP protection class: IP67- Homekit: Aqara Hub required
