Product Description

Netplus Smart Shutter Switch Module 1-channel WLAN shutter control

Product information "Netplus Smart Shutter Switch Module 1-channel WLAN shutter control"

The Netplus Smart Shutter Switch Module 1-channel WLAN shutter control works with motorised blinds, window curtains, shutters, awnings, etc. and enables them to be controlled remotely or wirelessly via a smartphone app. It is powered by a single-phase alternating current and displays the opening level of blinds, shutters, curtains or awnings so that they can be moved to the position you want.

Flexible installationThe Netplus Smart Home shutter module is designed to be compatible with existing shutter switches, retaining its technical function and making minimal changes to your existing electrical system. Thanks to its small size, this intelligent curtain switch module fits into most flush-mounted boxes without the need for conversion or rewiring.

Wi-Fi connectionUse your existing Wi-Fi network to achieve wireless control.

High compatibilityThis smart curtain module is compatible with existing curtain switches.

ScheduleCreate customised schedules based on your agenda or follow the sunrise or sunset.

Mobile app remote controlTake full control of your blinds/curtains/shutters via the mobile app, wherever you are. You want to fall asleep in bed after playing a mobile game, but your window curtain is still open. You don't want to get up? Easy, just close it with your mobile phone.

Hands-free voice controlNetplus smart curtain modules work with amazon Alexa/Echo/Dot, Google Home, Yandex, etc. After pairing with them, you can control your curtains and blinds with simple voice commands without touching a switch or opening the app, just ask Alexa to execute the commands.

Device SharingAdd your family members to the sharing list, then they can control the same devices.

Smart ScenariosSet the smart module to activate customised scenes based on temperature, humidity, light or various events. Use the Netplus Gate Smart Module to open your swing gate when you drive home and then switch on the lights and air conditioning when you park your car.

Features:- Input: AC100-240V 50/60Hz- Output: AC100-240V 50/60Hz- Load: max. 3A- Channels: 1 channel- Power measurement: No- Control app: SmartLife or Tuya Smart App- Operating range: < 200 metres- Standby power: < 0.5W- Overload protection: Yes- Neutral conductor required: Yes- Communication protocol: Wi-Fi 2.4GHz and BluetoothWireless standard: IEEE 802.11 b/g/n- Antenna: Ceramic antenna integrated on the PCB board- Security module: WPA / WPA2- Encryption type: WEP / TKIP / AES- Operating temperature: -10°C - +40°C- Housing temperature: Tc: +80°C (Max.)- Operating humidity: 5% - 95% RH, non-condensing- IP rating: IP20 for indoor use
