📄 Product Description

Shelly BLU Button1Product information "Shelly BLU Button1"So small it fits in your pocket. Carry and use it anywhere.Bluetooth-controlled action and scene activation button.Control and activate/deactivate various scenes and other Shelly devices remotely without using your mobile phone. Execute up to 4 predefined actions or scenes with simple click combinations.One click for a smarter home.With Shelly BLU Button1 you can quickly control your smart devices with just one click. Simply set it up and place it where you need it most. Whether you want to switch off the lights, adjust your blinds or lock your front door, BLU Button1 brings the power of your smart home directly into your hands.One device for all your rooms.Easily manage your smart home devices by creating customised actions that match your preferences. You can control an entire room with a simple push of a button, using four different push combinations. These push combinations can be assigned to different actions, such as switching off lights, adjusting blinds, controlling the garage door and much more! Use the Shelly Smart Control app to pre-set desired actions and let your imagination run wild.Your key to effortless scene control.Customise your smart home with just a combination of clicks! With Shelly BLU Button1 you can easily set your push sequence in the Shelly app and select different scenes with a range of actions. Use the Shelly Smart Control app to create a 'movie night' scene that sets your connected RGBW2 light strips to a dimmed blue, creating the perfect atmosphere for your film experience. When you leave your home, activate your previously set 'Away' scene to switch off all the lights in your home and lock the door with just one click.The secret to a smarter office.Set up your office environment quickly without interrupting your workflow! With Shelly BLU Button1 you can easily control separate devices or activate complex scenes to suit your specific needs. With a double click of the button, you can trigger a preset meeting scene that sets the lights, temperature and blinds to the optimum settings for your presentation. With three additional combination options, you have the flexibility to customise the button, making it the perfect tool to optimise your office workflow.Set the perfect brightness and position.Whether you want to partially open your curtains to let in natural light or fully close your blinds for more privacy, the Shelly BLU Button1 has the solution for you. With its customisable position control and dimming function, you can programme the button to control the position of your devices with different combinations of pressure - 75%, 50%, 25% or fully open/closed. The personalised dimming control works in the same way, allowing you to set the perfect lighting mood for any occasion, whether you're watching a movie or hosting a dinner party.Made for everyone!Enjoy all the benefits of modern technology without any of the fuss or hassle.No apps, no voice!No need to navigate through the app or shout at Alexa - a single button press controls your home.Incredibly configurable!Simple button combinations give you endless possibilities: Single Click, Double Click, Triple Click, Long Press.Scripting.Using the scripting features on your Shelly devices, you can easily create complex local actions that are triggered by the Shelly BLU Button1 when it's in range. Now you can fully customise and automate your smart home based on RSSI. In addition, you can use the same button to trigger different actions in different locations, such as at home, in the office and in the villa, without having to memorise different push combinations. Scripting functionalities create endless possibilities.High protection.By supporting the Advanced Encryption Standard, we have ensured that all communications are encrypted and secure. This encryption ensures that even if someone tries to intercept your device's communications, they cannot gain access to your data or compromise your security. What's more, with our device's built-in protection against replay attacks, you can rest assured that any attempts to tamper with the signal will be prevented.Features:Bluetooth-controlled action and scene activation buttonBluetooth-controlled: Use Shelly BLU Button1 to activate Shelly Plus and Pro devicesMulti-click action trigger: Execute up to 4 predefined actions or scenes with simple click combinationsInstant response time: response time under 2 secondsLow battery consumption: up to 2 years, perfect for those who are always on the moveVisual & audible cues: Sound and colour indications let you know the status and help you find itLong range: Shelly BLU Button1 has a range of up to 10 metres indoors and up to 30 metres outdoorsScripting functionality for endless actions based on locationFull compatibility with the new Home Assistant BTHome protocolUses BLE technologyCapable of turning devices on/off, dimming and activating scenesEncryptionFeatures sound and light alarms; "Hush" mode for silent function"Find me" function activated by beacon modePower supply with CR2032 battery (included)
