BAG_A005 - BagID Attachment Plate

from **18,73 EUR**

Item no.: 396416 shipping weight: 0.10 kg Manufacturer: Z-Wave.me

Product Description

BagID mounting plate-Article no.: BAG_A005 -EAN: 7072931100022 -Manufacturer: BagID -Manufacturer no.: A005 DescriptionProduct information "BagID mounting plate"BagID can be attached to your luggage with a mounting plate. The plate can be used for both hard-shell cases and soft bags. Once the mounting plate is attached, it is difficult to remove from the luggage. Therefore, think carefully about which piece of luggage you attach it to. If you want to use BagID for several pieces of luggage, you will need several mounting plates - or you can opt for a protective cover instead, which can be exchanged between different suitcases. This is how the mounting plate is attached: Insert the four pins through the mounting plate and the piece of luggage and attach them to the inside of the luggage using the small magnets. (The same technology is also used for theft of clothing in shops). The mounting plate is securely fastened and can only be removed with a magnet tool.
