from **10,31 EUR**

Item no.: 398102
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

This USB charging cable by Delock is characterised by its magnetic technology and enables quick and easy connection and disconnection between a device and the power source. With the help of the three included magnetic adapters, various mobile devices, tablets etc. can be charged either via the 8-pin Lightning™, Micro USB-B or USB Type-C™ connection. The adapters are designed so that they can remain in the socket of the device and prevent wear on the socket as well as serving as dust protection. The round magnetic connection on the USB charging cable allows it to connect magnetically to the device immediately. The cable is very hard-wearing and durable thanks to its robust textile sheathing and metal housing at both cable ends.
