Product Description

Optical cable from the renowned Maclean company MCTV-452. One of the main advantages of this model are reinforced metal connectors, which give the cables in this line unrivalled durability on the market. The cable is also very flexible. The cable has been designed to meet the highest technical requirements and satisfy the most demanding audiophiles while surprising them with its great design. Maclean cables ensure lossless signal transmission for the clearest and most realistic sound effects. The Maclean optical cable is especially recommended for high-quality digital connections - whether satellite tuner, Blu-ray player, games console or other modern entertainment devices. The cable is ideal for connecting a CD/SACD/Blu-ray player/DVD/TV/SAT player or a computer/console to a home cinema receiver, for example, to transmit a digital audio signal. When you connect your home cinema to our cable, you get 5.1 or 7.1 surround sound. It is currently the most technologically advanced cable on the market! High quality guaranteed from a renowned manufacturer. By connecting this multimedia cable to your home cinema receiver, you get digital effects: Dolby Digital, Dolby ProLogic, Dolby Surround, DTS etc. - Producer: Maclean - Model: MCTV-452 - Length: 2.5 m - Connection: Toslink TT - Ultra-thin and flexible cable (only 4 mm) - The cable is made of the highest quality bend-resistant fibre - A narrow cord for greater comfort and mobility - Metal plugs are plated with 24-carat gold to ensure the best possible contact with the sockets in the device - Provides lossless transmission of an uncompressed signal - Very precise and solid workmanship - 99,99 % immunity to electromagnetic interference - Meets CE standards - Toslink TT Tape Maclean MCTV-452 2.5 m fibre optic cable - Manufacturer's packaging - Proof of purchase Maclean is a global market leader for special cables, home cinema accessories, hi-fi systems and PC connections.
