TAPO C425(4-PACK) - , outdoor IP camera, 4MP, 2.1mm, WiFi, battery

from **522,28 EUR**

Item no.: 392265
shipping weight: 2.30 kg
Manufacturer: TP-LINK

Product Description

Tapo C425 is an outdoor bullet camera from the TP-Link Tapo series that can store recordings on a memory card with a supported capacity of up to 512GB or on the Tapo Care cloud storage (subscription required). The maximum resolution of the camera is 2560 x 1440 px at 25/30fps (4MP) and thanks to the lens with a focal length of 2.1mm, it offers a wide field of view of 134° horizontally. In the event that visibility is restricted, the equipment has an IR illuminator with a range of up to 15 metres, and a built-in siren and light alarm deter unwanted visitors. The camera is also equipped with two-way audio in case communication is required. The camera is powered by a battery with a runtime of up to 300 days*. The battery life can be extended by using a Tapo solar panel. Thanks to the IP66 protection rating, the camera is also suitable for outdoor use. The camera connects to the network via WiFi 802.11b/g/n.* The battery life of 300 days is based on TP-Link laboratory tests with 230 seconds of use per day. Increased usage of 360 seconds per day reduces battery life to 180 days. Actual battery life may vary due to device settings, router specifications, usage and environmental factors.

Key Features- Wireless, installs almost anywhere: Provides 100% wireless installation. A magnetic base allows for easy adjustments and battery access.- Easily set the optimal angle: The adjustable magnetic base allows you to monitor the device from any angle.- Long-lasting performance: The 10000 mAh battery provides up to 300 days of continuous performance on a single charge.- 2K QHD Live View: Delivers crystal clear and detailed images with a resolution of 2560x1440, which is 1.7x more pixels than 1080p.- Colour night vision: Increases your safety with brighter, full-colour images and vivid details even in low light conditions with built-in spotlights and the starlight sensor.- Greater visibility, more detail: Expands your field of view with a 150° super-wide FOV.- Customisable activity zone: Set up specific detection zones to be alerted for the most important areas.- Free AI detection: Using AI technology, the camera issues alerts when it identifies people, pets and vehicles to avoid false alarms and unnecessary notifications.- IP66 weatherproof: Provides excellent waterproof and dustproof performance for outdoor scenarios.- Tapo solar panel supported: Keep your camera working around the clock with the Tapo A200 solar panel.

Package contents- (4) Tapo camera- (4) USB adapter with cable- (4) Magnetic base- (4) Mounting template- (8) Screws and dowels- (4) Metal plate- (4) 3M adhesive
