TAPO RV20 MOP - MagSlim LiDAR hoover and mop robot

from **236,87 EUR**

Item no.: 392178
shipping weight: 4.80 kg
Manufacturer: TP-LINK

Product Description

The Tapo RV20 Mop utilises LiDAR's new MagSlim navigation system to perfectly map your home. The mop has 4 suction levels, with the strongest level delivering up to 2700 Pa. It is a combination mop and hoover, meaning it can mop and vacuum at the same time. The two side brushes are thin and can clean every corner of your home. Thanks to the large battery, the hoover can be used for up to 3 hours without interruption, making it suitable for cleaning larger areas. If you need to clean for longer, it will drive itself to the charging station and start cleaning again as soon as the battery is charged to finish cleaning. The slim design allows you to clean in hard-to-reach places; the hoover is 7.8 cm high. The noise level during cleaning is also low, only 51 dB. Main features- High-quality navigation system- 4 suction levels- Combination of hoover and mop- Automatically returns to the charging station when the battery runs low during cleaning- Up to 3 hours of cleaning without interruption- Low noise level of 51 dB- Can be controlled via voice assistants (Google Home, Amazon Alexa) Package contents- Device- Charging station + adapter- Wipe holder- 2x washable wipes- 4x side brush- 2x HEPA filter- Cleaning brush- User manual
