Product Description

Product information "myStrom WiFi Button Max with e-paper display" The revolutionary myStrom Button Max WiFi button is a smart home app and status display in one. With an economical e-paper display and sensors for temperature and humidity. The ultimate smart home button. With Button Max, you can use an optimised version of your myStrom app, with family-friendly navigation via the four corner buttons. Versatile and personal. Button Max adopts the names, symbols and language settings of the myStrom app*. During installation, you also select a display focus such as "Rooms" or "Electricity measurement data". *Button Max supports German, English, French and Italian. Control without compromise. Button Max allows an astonishing number of interactions such as... switching switches.... switch, dim, tone and colour lights - including dingz and modulo.... control speakers from SONOS and IKEA SYMFONISK (after linking with myStrom App).... control lights, blinds and switches from Philips Hue, IKEA TRÅDFRI and Shelly (requires myStrom Home). Informative. Button Max displays the total power consumption of all devices and the total power generation of mini PV systems as totals, as well as the temperature and humidity it measures. Burglary protection. With Button Max, you can activate myStrom Home Guard at the touch of a button, including a 60-second countdown.
