📄 Product Description

The Aqara Smart Video Dorrbell G4is a unique video doorbell that can be wired or battery operated. With the integrated AI-based facial recognition algorithms, you can tag the faces of its family members and frequent visitors in the Aqara Home app, reducing false alarms and notifications.With 24/7 1080P FHD recording, you can check what happened at the front door at any time. In addition to the free event-based cloud storage of up to 7 days included in the scope of delivery, the doorbell repeater also supports micro SD cards with up to 512 GB, which cannot be accessed externally. HomeKit, Alexa, Google Assistant, IFTTT are supported.Mounting:The outdoor doorbell can be mounted on the wall, the indoor unit can be mounted on the wall or placed on a flat floor.Voice change option:The G4 has a unique dialogue technology for voice switching. It is something special in the category of video doorbells. The user can change the intercom voice to an uncle voice, robot voice and clown voice, which can better protect the user's privacy and identity.Do Not Disturb Mode Support:The user can customise the doorbell ring time and ring volume. When "Do Not Disturb" mode is enabled, users can sit back and relax even if someone rings maliciously in the middle of the night.Personalised custom ringtones:Supports users to upload personalised ringtones that can be automatically configured to play on the outdoor doorbell or indoor repeater, and enables automatic linkage configuration, such as recognising strangers and the indoor repeater. For example, recognising strangers and sending "Tom is not at home, please come back tomorrow" on the outdoor doorbell.Various alarms for abnormal conditions:When the doorbell is forcibly dismantled, the outdoor temperature is abnormally high/low, people stay at the door, the battery power is low, etc., the alarm status can be flexibly configured to remind the owner to pay attention to the security status of the door and the operating status of the equipment.Set masking area:Privacy protection can be set for up to 3 specific areas on the screen. After setting, the specified areas on the live screen and video screen will be blocked, which can protect the privacy of neighbours. This function is particularly suitable for users living in apartment blocks.Features:- Wireless connection: 2.4GHz, IEEE 802.11b/g/n- Video resolution: 1080p FOV 162° (viewing angle)- Battery specification: 6x AA 1.5V LR6 batteries- Power supply: 12V-24V AC 0.2A 50/60Hz 8V-24V DC 0.5A- Local storage: Supports up to 512GB microSD card- Repeater power supply: 5V/1A USB-A to USB-C- Supply line operating temperature: -18° - +50°- Humidity: 0%-95%, non-condensing
