shipping weight: 0.30 kg
Manufacturer: Senic

Product Description

The wireless and battery-free Friends of Hue smart switch gives you and your family easy control of the entire Philips Hue universe. How it works: Control up to 50 Philips Hue lamps and lights at the same time. With the Philips Hue app, you can set your favourite settings, rooms and light scenes with a few simple clicks. Compatibility: Philips Hue offers over 100 different products. Our switches are officially "Friends of Hue" certified, tested and work with all Hue devices. Battery-free switch: Thanks to energy harvesting technology, the Friends of Hue switch generates enough energy to send a wireless command every time you press it. This means that no cables or batteries are required and the switch never needs to be recharged. Minimalist design: Together with our partner Gira, we have created the switch in a timeless E2 design. This also means that the switch and dimmer fits perfectly into existing GIRA System 55 frames and therefore offers a uniform appearance. The product is manufactured and assembled entirely in Germany. Also works with HomeKit: Via the Philips Hue Bridge (v2), the switch is also compatible with HomeKit scenarios or devices, including speakers such as Sonos or Homepod, sockets or lawn sprinklers. Trigger your favourite scenarios with a simple push of a button. Features: - Switch for Philips Hue - Compatible with Gira System 55 - Available in various colours - Compatible with Philips Hue and HomeKit via Hue Bridge (v2) - Battery-free - Indoor range: Up to 20 m - Scope of delivery: Friends of Hue Smart Switch, quick guide, 1x single rocker per switch, 1x double rocker per switch. Further data: WEEE - yes CE - yes IP class - IP20
