## MYLSX1 - WiFi Switch Ex

from **82,74 EUR**

Item no.: 396451  
shipping weight: 0.30 kg  
Manufacturer: myStrom

### Product Description

The new myStrom WiFi Switch Ex (Wieland) is the robust WiFi switch variant for outdoor use. It can withstand temperatures between -20°C and 50°C and is IP65-certified. This makes Switch Ex ideal for small to medium-sized PV systems. The new version of the myStrom app goes hand in hand with this and brings the graphical analysis of the current measurement data to the smartphone and tablet dashboard in full screen. In the near future, we will further enhance this new view with solar-specific information on weather, efficiency and more. Features:- WiFi Switch Ex (Wieland)- Protection class: IP65 (dustproof and protection against water jets (nozzle) from any angle.)- Operating temperature: -20 to 50°C- The device has a Wieland connection cable- Radio technology: Wi-Fi IEEE802.11n 2.4 GHz- Power consumption: max. 1.5W- Voltage range: 220 - 240V 50/60Hz- Measuring range: 2W - 3680W- Max. Power: 3650W
