## MCE324 - PIR sensor plafond, ceiling mounting, replaceable light source, 2x max. 40W, E27

**9,63 EUR**

Item no.: SC-2410-2509-1603  
shipping weight: 0.40 kg  
Manufacturer: Maclean Brackets

### Product Description

LED motion detector for rooms such as stairwells, corridors, basements, garages, cloakrooms, toilets, etc. The infrared sensor enables the light to switch on automatically when movement is detected. This motion detector saves you money on your electricity bill because the lighting only switches on when you need it! Two light bulbs with an E27 thread of up to 40 W each serve as the light source.

Technical data- Power supply: 220 240 V/AC- Mains frequency: 50/60 Hz- Light sensitivity: <3 LUX (adjustable)- Operating time: 12 sec 5 min- For light bulbs max. 2x 40 W- Detection range: 360°- Installation height: 2.5 3 m- Bulb thread: 2x E27 Advantages of using plafonds with built-in motion detector- Power consumption savings thanks to automatic switch-off- Convenient, automatic lighting switch-on- One unit, lower costs than buying a motion detector + plafond- No additional wiring required to the motion detector- No UV or IR radiation (does not attract insects)- Quick and easy installation- Motion detector has a range of up to 8 m
