M6-UP-WIFI - MOSAIQ6 - WIFI 5GHz Option

from **668,47 EUR**

Item no.: 389804
shipping weight: 0.00 kg
Manufacturer: Teledes

Product Description

This functionality performs a comprehensive analysis of the entire Wi-Fi band (2.4 and 5 GHz) to find, identify and measure all available Wi-Fi networks. For this purpose, the MOSAIQ6 offers 4 different analysis functions:- Wi-Fi list: shows a list of all networks found and identifies for each one: SSID, BSSID, channel, frequency, encryption mode and performance of the access point.- Wi-Fi measurements: shows for a given network the current performance value of the access point and a diagram of its change during a selectable time interval.- Time diagram: provides a time diagram with the history of performance measurements of all detected Wi-Fi networks.- Channel map: shows a diagram with the channel distribution of the detected Wi-Fi networks.
