H30EUP-IPTV - H30Evolution Option IPTV - Analyser

from **252,80 EUR**

Item no.: 389784
shipping weight: 0.00 kg
Manufacturer: Teledes

IPTV		
Pkts	3008	pps
Pkt arrival min	325	us
Pkt arrival max	351	us
IP payload BR	32.630	Mbps
UDP payload BR	31.956	Mbps
Media Loss Rate	0	ppm
Lost IP frame	10	frames

Product Description

It enables the demodulation and analysis of IPTV streams (both unicast and multicast), not only by displaying video, but also by displaying the total bitrate and bitrate for each service present. The relevant information for each service is also already included: SID, VPID, AID, video profile, bit rate for audio and video. In addition, this option completes the RF measurements as all this information by service is also analysed for this type of signal. For IPTV signals, specific protocol measurements (UDP/RTP) are also performed, such as UDP format, media loss rate, lost IP frames.
