from **54,66 EUR**

Item no.: 389277
shipping weight: 0.10 kg
Manufacturer: Televes

Product Description

LC/APC, singlemode (SM), LSFH indoor cableKit with 24 singlemode (SM) fibre optic pigtails in different colours, in 2 bundles of 12 fibres each. One end is fitted with LC/APC connectors for quick and easy connection to optical network devices, headends and accessories in communication cabinets. The other end is not ready for connection, which makes this pigtail kit particularly useful for splicing with multi-fibre cables in a typical backbone of an apartment building. In addition, the different colours help to identify the different connections and the design in groups of 12 fibres makes it easy to organise shelves and drawers in racks and fibre optic racks. The jacket is LSFH and is recommended for indoor installation. Highlights Pigtail: one end without connector for easy connection of the pigtail to a fibre cable Easy identification of each fibre: 12 different fibre colours and rings to identify each colour Useful for splicing with multi-fibre cables Features Fibre type ITU-T G.657A2 LSFH jacket LC/APC connectors 1 m long Low insertion loss
