TAPO RV20 MOP PLUS - MagSlim LiDAR Hoover and mop robot

from **338,02 EUR**

Item no.: 392177
shipping weight: 10.50 kg
Manufacturer: TP-LINK

Product Description

The Tapo RV20 Mop Plus utilizes LiDAR's new MagSlim navigation system to perfectly map your home. The mop also has 4 suction levels, with the most powerful level delivering up to 2700 Pa. It is a combination mop and hoover, meaning it can mop and vacuum at the same time. The two side brushes are thin and can clean every corner of your home. The automatic emptying of the hoover takes place in the 4-Lin station, which offers a cleaning-free service life of around 70 days. Thanks to the large battery, the hoover is ready for use for up to 3 hours without interruption, making it suitable for cleaning larger areas. If you need to clean for longer, it will drive itself to the charging station and start cleaning again as soon as the battery is charged to finish cleaning. The slim design allows you to clean in hard-to-reach places; the hoover is 7.8 cm high. The noise level during cleaning is also low, only 51 dB. Main features - High-quality navigation system - 4 suction levels - Combination of hoover and mop - Automatic emptying of the dirt container - Automatic return to the charging station when the battery is low during cleaning - Up to 3 hours of cleaning without interruption - Low noise level of 51 dB - Control via voice assistant (Google Home, Amazon Alexa) Package contents - device - dirt emptying station - wipe holder - 2x washable wipes - 2x 4L dirt bag - 4x side brush - 2x HEPA filter - cleaning brush - user manual
