📄 Product Description

TL-PA4010PKIT transforms your existing electrical network to high-speed Internet network without additional wiring or drilling. No need for any configuration, just plug adapters into electrical outlets to create an instant network infrastructure. The integrated power socket means that you can still get power from the outlet for your other devices. Modulation speed of TL-PA4010PKIT is up to 600Mbps and on both sides brings 1x 10/100Mbps Ethernet for connection to a switch, router, computer or other device with an RJ45 port. The package except units and 2 pieces of 2 meters of Ethernet cables.Technical parametersPowerline- Range [m]: 300 - Powerline security: 128bit AES - Modulation technology: OFDM - Powerline speed [Mb/s]: 600 Connectors and Interfaces- Integrated power socket: Yes - LAN speed: (1) 10/100Mbps Power- Max. power consumption [W]: 2,5 Physical characteristicsButtons: Pair - Width [mm]: 58 - Height [mm]: 95 - Depth [mm]: 42
