WIBOX EXTRA LARGE - WiBOX Extra Large Outdoor Enclosure without Antenna

36,13 EUR

Item no.: WIBOX_EXTRA_LARGE
shipping weight: 2.20 kg
Manufacturer: QuWireless

Product Description

WiBOX Extra Large Outdoor Enclosure without Antenna This box was designed for base station installations, wireless bridges with high throughput and for hotspots, as well as for systems, working at different frequencies. Its designed for operating with antennas that have high gain. The available space (23 cm x 45 cm) allows for high discretion of radio board installations (the full range of the MikroTik RouterBoard series and most of the Ubiquiti product lines). The antenna system is available for the full range of single and dual polarity antennas (working at different frequencies) and for different antennas working in one box (base system integration).
