from **41,11 EUR**

Item no.: 400916  
shipping weight: 0.10 kg  
Manufacturer: Aqara

### Product Description

The Aqara Smart Wall Switch H1 EU (Without Neutral) is based on the Zigbee 3.0 wireless communication protocol and is a smart switch for switching lamps and other electrical devices on and off. Once connected to an Aqara hub, it can implement remote control via the Aqara Home app, time control and other functions and work with other intelligent devices in smart home automation. This product requires a compatible Zigbee 3.0 hub. A dedicated hub is required for some functions. Features: - Suitable for operation in a switch box without a neutral conductor. - Input power: 100-250VAC, 50/60Hz - Switching power: max 1840W (8A resistive load) - Wireless protocols: Zigbee 3.0 - Operating temperature: 0°C?40°C - Operating humidity: 0%~95% RH, non-condensing - Box contents: Smart Wall Switch H1 EU x 1, Quick Start Guide x 1, Screws x 2
