

Item no.: 388195

TESLA Smart Home Smart Power Strip 3 4 USB Wi-Fi

from **42,71 EUR**

Item no.: 388195
shipping weight: 0.90 kg
Manufacturer: TESLA Solar

Product Description

If you want to operate more devices remotely, the Power Strip is the right choice. It allows you to operate up to seven devices individually while keeping a good overview of their power flow and power consumption. This allows you to better optimise the efficiency of your home operation and thus save energy costs. You can constantly monitor consumption. A smart socket allows you to know exactly how much electricity is flowing through it at all times. This way, you always have an overview of these values. Separate control. Sockets and USB ports are controlled separately. You can perfectly manage the individual devices connected to the power strip. Wide range of automation options. The TESLA Smart app on your smartphone allows you to set up individual sockets and USB ports as required. They are easy to set up and it only takes a few minutes. Easy to use. Manage all sockets and USB ports via an app on your iOS or Android smartphone or tablet. You can operate each socket and USB port separately. The app also shows you at any time and from anywhere whether the socket or connection is currently switched on or off. An iron that is still plugged into the socket and you have forgotten about it will never bother you again. A smart socket can not only make your home smarter, but also safer. Assistants for maximum convenience. The TESLA Smart app, which controls the smart socket, can be connected to the intelligent personal assistants Google Assistant or Amazon Alexa. With voice input, they make your job even easier. Up to 3 devices with 4 USB. Manage all sockets and USB ports via an app on your iOS or Android smartphone or tablet. Turn ordinary devices into smart devices. Thanks to the app, the smart socket has many ways to automate it. One major advantage is the ability to turn even conventional devices into smart devices. The ability to operate each socket separately is useful if, for example, you plug a classic lamp into one socket and wireless headphones into the other. Then you can charge your wireless headphones remotely without switching on the lamp. Features:- A smart socket for connecting up to 3 devices with 4 USB ports- ID: TSL-SPL-3+4- Maximum current for one USB: 2.4 A- Maximum load: 16 A / 3680 W- Power supply: 220-240 V AC 50 Hz- Operating temperature: 0-35 °C- Operating humidity: 5-65 %- Connectivity: Wi-Fi 2.4 GHz IEEE 802.11b/g/n- App TESLA Smart: Google Android 6.0+, Apple iOS 11.0+- Management App: SmartLife or Tuya Smart App
