from **20,56 EUR**

Item no.: 388200  
shipping weight: 0.10 kg  
Manufacturer: TESLA Solar

### Product Description

Whether we are going on holiday, on a business trip or just doing the usual shopping, the fear of burglary is always present for all of us. TESLA Smart Home Smart Door Window Sensor Zigbee can allay these concerns. These small and unobtrusive sensors make every time you leave the house much quieter. Constant monitoring The sensor constantly records the position of windows and doors and notifies you immediately if anything suspicious happens. Easy to operate You set everything up via a smart app that you download to your smartphone or tablet. This gives you an overview of your home from anywhere. Saves energy TESLA sensors are very energy efficient. They can run for up to two years on a single battery. Stylish helpers that never get tired It's not just the design that makes these modern monitoring tools so impressive. Their service life is also impressive. They can be operated for up to two years on a single battery. And if they run out of power despite their high energy efficiency, they require a battery change. Zigbee protocol The product belongs to a group that uses the ZigBee protocol, which allows the products to communicate with each other. For these products to function properly, the TESLA Smart ZigBee Hub control centre is required as part of the smart home. This creates a common network for these products and allows them to interact with each other. For example, if the humidity sensor detects an increased value, it automatically notifies the dehumidifier via the TESLA Smart ZigBee Hub, which starts up. Nothing catches it that easily As soon as it detects something suspicious, it will let you know. Google Assistant and Amazon Alexa are no problem The TESLA Smart Sensor Window and Door sensor uses the ZigBee protocol. The device is controlled via the TESLA Smart app, which you can download to your Android or iOS smartphone. You can also connect your device to the smart personal assistants Google Assistant and Amazon Alexa. This makes working in your smart home even easier. Keep track of everything from anywhere The TESLA Smart Sensor Window and Door uses the ZigBee protocol, which allows smart devices in your home to be connected to each other. This way, you won't miss anything that's going on at home. The sensors recognise every movement of the windows or doors and inform you immediately on your smartphone or tablet. The app can be installed in just a few minutes and is easy to use.
