TESLA Smart Home Smart Switch Dual Battery Zigbee

from **24,98 EUR**

Item no.: 388207
shipping weight: 0.20 kg
Manufacturer: TESLA Solar

Product Description

The TESLA Smart Home Smart Switch Dual Battery Zigbee is easy to set up and operate via the TESLA Smart mobile app. It's also battery-powered, so you don't have to worry about installation - just stick it anywhere on the wall. Ease of use: You can operate the switch manually by pressing the button or remotely via your phone. This is made possible by a smart app that you download to your Android or iOS phone. High reliability: The smart home uses the ZigBee protocol. This enables communication between devices in the same household. In addition to a range of up to 50 metres, it is also a very stable and reliable system. Long service life: Changing the batteries is not a problem. What's more, with an energy-saving device like this switch, you only have to worry about this problem every two years or so. Programmable buttons for easy operation: TESLA Smart Switch Dual Battery is equipped with programmable buttons. Each of the buttons recognises three operating variants - press, double press and long hold, which can be assigned any function. For example, a long hold switches the light off, a double press switches it to night mode. Operating any device: There are countless variations in which the switch can be used. Which one you choose is up to you. Connects the house and provides convenience: With the TESLA Smart app, you can also connect the switch to other intelligent assistants and set automatic scenarios for it in the app. In practice, this means that as soon as you switch off the light in the bedroom at night, the outdoor cameras are triggered and the air purifier switches to sleep mode. Ideal for smart lamps: Owners of smart lamps often encounter a fundamental problem: if you switch them off with a classic switch, they can no longer be operated via the app and you have to switch them on again. This won't happen with a TESLA Smart Switch Dual Battery. The lamp goes out, but is still energised. Features: - Smart Switch Dual Battery Zigbee- ID: TSL-SWI-SCENEZG2- Radio signal range: 25 m (free space)- Power supply: 1x button cell CR2430- Operating temperature: -10-45 °C- Humidity measuring range: < 90 %- Dimensions: 86 x 86 x 13 mm- Connectivity: Zigbee- TESLA Smart app: Google Android 6.0+, Apple iOS 11.0+
