TESLA Smart Home Smart Thermostatic Valve TV100

from **44,26 EUR**

Item no.: 388212
 shipping weight: 0.30 kg
 Manufacturer: TESLA Solar

Product Description

An intelligent helper that saves heating costs. By detecting open windows or in holiday mode, the intelligent thermostatic valve reduces the energy consumption of the heating without affecting your comfort in any way. It works completely independently or you can operate it yourself via an app that is available for iOS and Android in German. Easy-to-read LCD display. With an easy-to-read high-contrast display and a large control element, controlling the valve is very easy. You set the temperature in the same circular motion as with a conventional valve and switch between the individual functions by pressing the entire button. Anyone can operate it. The LCD display with LED backlighting and large buttons ensures that anyone can control the thermostatic valve. However, if you are not nearby, you can set the temperature from anywhere using your phone. The intelligent machine is powered by two AA batteries, which have a lifespan of up to 18 months. For new batteries, just go to the supermarket. The product belongs to a group that uses the ZigBee protocol, which allows the products to communicate with each other. For these products to function properly, the Tesla Smart ZigBee Hub control centre is required as part of the smart home. This creates a common network for these products and allows them to interact with each other. For example, if the humidity sensor detects an increased value, it automatically notifies the dehumidifier via the Tesla Smart ZigBee Hub, which starts up. Features: - Battery life: Up to 18 months - Display: LCD s LED backlight - Valve type: M30, M28, Danfoss, RA, RAV, RA VL - Power supply: 2x alkaline battery 1.5 V LR6 / AA - Operating temperature: 5 - 30 °C - Dimensions: 55.3 x 54 x 98.3 mm - Connectivity: ZigBee - Open window detection - Holiday mode - Automatic and manual mode - Eco mode - Temperature offset
